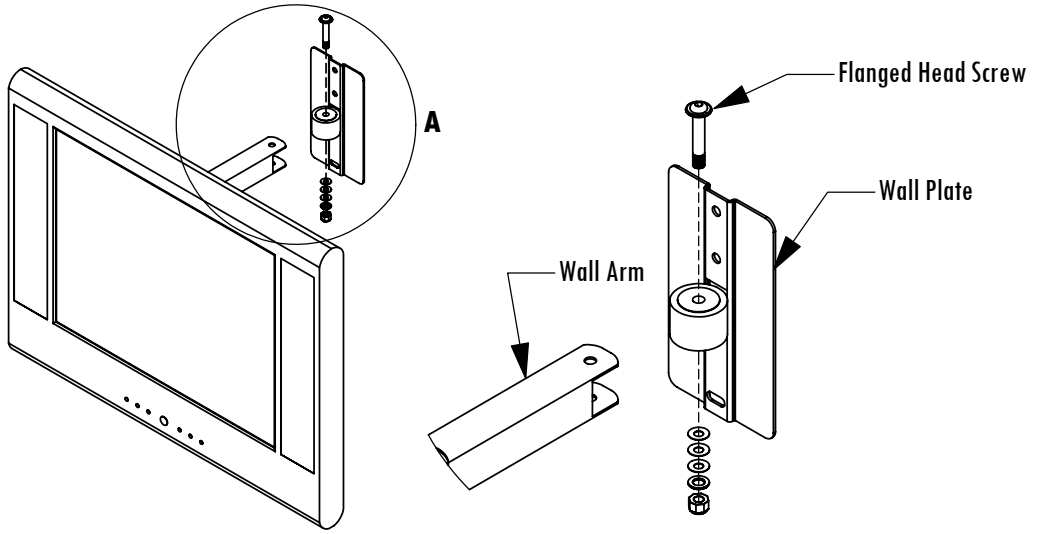
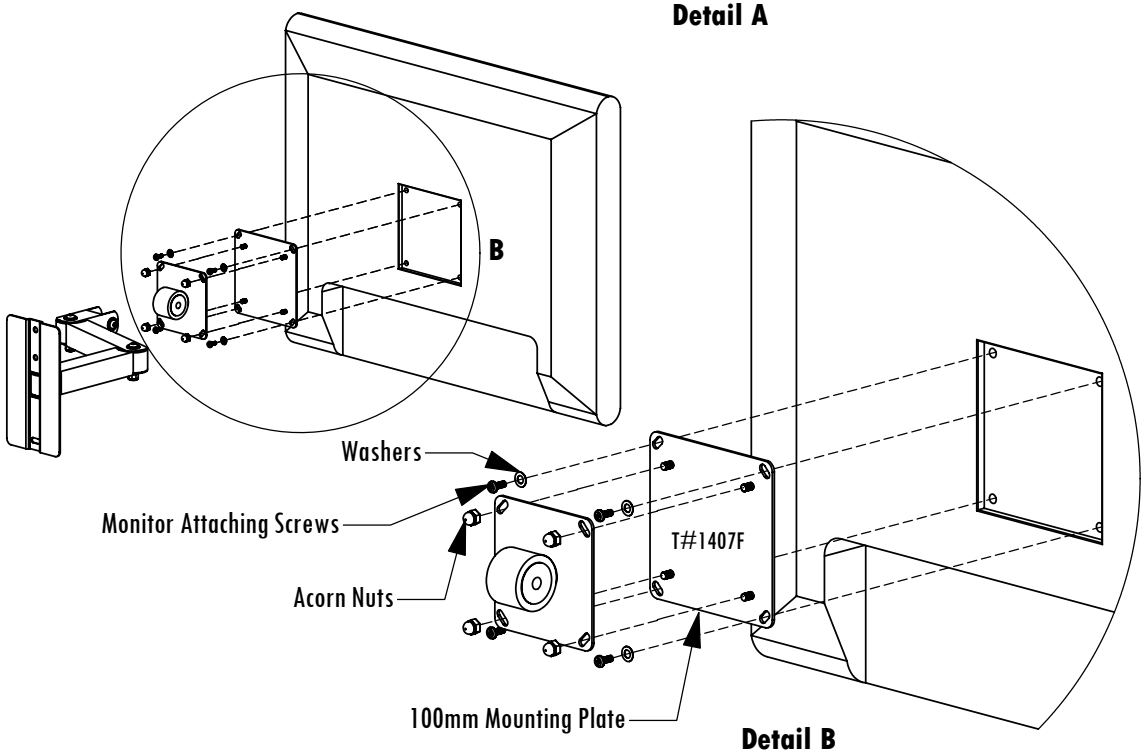
LUCASEY MOUNTING SYSTEMS

THLCDWD



Detail A



Detail B

1. Determine the best possible viewing location for the monitor and make sure the mount can be adjusted to this location while lining up with a stud in the wall.

2. Remove the Flanged Head Screw from the Wall Plate.

3. Making sure the Wall Plate is level, use the Wall Plate as a template to mark the locations for the attaching screws.

4. If mounting to wood studs, drill pilot holes for each of the wood lag screw locations. If mounting to concrete or metal studs follow the directions provided for this hardware.

5. Attach the Wall Plate to the wall. Make sure the slotted hole is on the bottom to allow for some side to side adjustment after the monitor is attached.

6. Remove the acorn nuts from the 100mm Mounting Plate. Attach the 100mm Mounting Plate to the back of the monitor with screws that are the appropriate size and length. The appropriate screws to use are specified by the monitor manufacturer.

   Warning: Failure to use the appropriate size and length of screw may cause the monitor to drop from the mount or damage the internal electronics. Must use 4mm x 10mm screws on 20" models: PDI-P20LCDC and LD-20A76UD.

7. Attach the Wall Arm with the Flanged Head Screw removed in step 2.

8. Attach the Monitor with 100mm Mounting Plate using the Acorn Nuts removed in Step 6.

9. Adjust the monitor to appropriate viewing angle and level with the slot on the Wall Plate and the slots on the Mounting Plate. Adjust the tension on all the joints to make sure the monitor stays in the proper position for viewing.

Hardware List

3 ... #14 x 2-1/2" Wood Lag Screws
4 ... 4mm x 12mm Phillips Screws
4 ... 4mm x 10mm Philips Screws
8 ... 5mm Washers
